

## Press Release

### *National Workshop "ALL-Organic" 2023*

The Romanian Association for Sustainable Agriculture (A.R.A.D.) organized on November 2, 2023, in the festivity hall of the Research-Development Station for Viticulture and Vinification Murfatlar in Constanța county, the first National Workshop within the project "Agroecological Living Laboratories for promoting resilient systems of organic production (ALL Organic)", a project that is being carried out over the period 2021 – 2024 and is funded by the Executive Unit for Financing Higher Education, Research, Development, and Innovation (UEFISCDI).

In the "ALL-Organic" project, A.R.A.D. participates as a partner, along with 6 other research units and universities: CREA - Council for Agricultural Research and Economics from Italy (Project Leader), IUNG-PIB - Institute of Soil Science and Plant Cultivation from Poland, EULS - University of Life Sciences from Estonia, ENSA - National Higher School of Agronomy and INRRA - National Institute of Agronomic Research from Algeria, as well as FIRAB - Italian Foundation for Research in Organic and Biodynamic Agriculture from Italy.

At the "ALL-Organic" workshop in Murfatlar, the representative actors of the agroecological business models from the development regions "South-Muntenia" and "South-East" – farmers, processors, traders of agricultural and food products and of organically certified inputs, researchers in organic agriculture and experts in permaculture, including the young researchers of the host and the "ALL-Organic" research group of A.R.A.D, as well as the responsible parties of the inspection and certification bodies from the two development regions, participated very actively and efficiently.

The program of this event included:

- Presentation of the "ALL-Organic" project, authors Ion TONCEA, Aurora Ranca, Tudor Stanciu, and Vladimir Adrian TONCEA;
- Presentation of business models and display of agro-food products and agroecological services by participants: agricultural producers and of agro-food products and agroecological inputs and providers of agro-ecological research - innovation services and of inspection and certification.
- Assessment by the workshop participants of the "Agroecological Living Lab" status of their own business models/cases through a set of questions regarding: the liveliness of the

business's components, activities, products, etc., and the ease of perceiving this quality; the diversity of the business-specific activities or products; the IT techniques employed and their effectiveness; and the role and significance attributed to the consumer within the business.

**Dr. ing. Ion TONCEA**  
*Responsabil proiect*  
*Președinte A.R.A.D.*  
*N. Titulescu 1, 915200 Fundulea, Județul Călărași*
